Allowed Claims: 1-13.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: none of the prior art either alone or in combination disclose or teach of the claimed combination of limitations to warrant a rejection under 35 USC 102 or 103.

Specifically, with respect to independent claim 1, none of the prior art alone or in combination disclose or teach of a method of operating a digital micromirror device comprising applying a reset voltage pulse to the micromirror and applying an offset voltage to the micromirror immediately after the reset voltage pulse as claimed, specifically comprising applying a damping pulse to the micromirror immediately after the offset voltage and reapplying the offset voltage to the micromirror, whereby the damping pulse reduces oscillation of the micromirror about a neutral position.

Specifically, with respect to independent claim 9, none of the prior art alone or in combination disclose or teach of a method of operating a digital micromirror device comprising applying a reset voltage pulse to the micromirror and applying an offset voltage to the micromirror immediately after the reset voltage pulse as claimed, specifically comprising applying a damping pulse to the micromirror immediately after the offset voltage and reapplying the offset voltage to the micromirror, whereby the damping pulse reduces oscillation of the micromirror about a neutral position and whose voltage is the same as the reset voltage.

CITATION OF RELEVANT PRIOR ART

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gale, Jr. (U.S. 5,285,196) is being cited herein to show a method of operating a digital micromirror device comprising some of the steps of the claimed invention, but does not specifically disclose the applying a damping pulse to the micromirror immediately after the offset voltage and reapplying the offset voltage to the micromirror, whereby the damping pulse reduces oscillation of the micromirror about a neutral position.

CONCLUSION

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William C. Choi whose telephone number is (571) 272-2324. The examiner can normally be reached on Monday-Friday from about 9:00 am to 6 pm.
